

Theory and Design

A **Healthcare and Medical Website** is a digital platform designed to provide medical information, healthcare services, patient support, and other health-related functionalities. These websites can be built for hospitals, clinics, medical professionals, or health-tech companies and can serve various purposes, such as appointment booking, telemedicine, patient records management, and health education

1. Login Page

The user needs to enter the name and phone number to login .

A login form with a light gray border and rounded corners. At the top left is the title "Login" in bold black font. Below it are two input fields: the first contains the placeholder text "Enter your name" and the second contains "Enter your phone number". Both fields have a light gray border. At the bottom is a dark blue button with the word "Login" in white text.
